# INTRODUCTION

Now a days, Everyone wants to be rich as soon as possible, I am sure you too.. Right?

There are number of ways to be rich, but the most easiest way is INTERNET ! You might have heard every 4 out of 5 people are rich just because of the INTERNET. Yes ! Now its your turn..

Now You might be thinking if INTERNET is the most easiest way, then why Everybody is not rich?

Here's the answer.. Most of the sites on the INTERNET are a SCAM which takes your hard-earned money and assure you that they will make you rich but this nothing happens at all. People are caught by scams and waste a lot of money. Only a few sites are genuine and real which gives you money. That is the main reason why everyone is not rich. So it is the most important thing to choose a right site on the INTERNET.

The most common ways to earn money on the Internet are:

- ✓ Make your own website and sell products. But it needs a lot of skills and it's very costly.
- ✓ Pay per click on ads (it gives a very less money and most the sites are scams)
- ✓ Promote ClickBank products
- ✓ Writing Articles
- ✓ Take project and complete it. ( It can also take a lot of time and needs a lot of skills)
- ✓ Etc... etc...

So here is the simple and the most popular way to earn money on INTERNET.

## **PLAYING ONLINE GAMES**

**Casino Online Games** are the best way to make money and are becoming popular day by day.

Online casinos can be divided into two groups based on their interface: web-based and download-only casinos. Some casinos offer both interfaces. Some casinos offer 'Live gaming', either exclusively, or as part of a wider online casino offering. In live online casinos, popular casino games such as Roulette and blackjack are dealt by real dealers in casino studios, in an attempt to convey more of the atmosphere of a physical casino. Now you must wonder what are Web based casinos and what are downloadable casinos.

Web-based online casinos are websites where users may play casino games without downloading software to the local computer. Download-based online casinos require the download of the software client in order to play and wager on the casino games offered. The online casino software connects to the casino service provider and handles contact without browser support.

### **GAMES OFFERED :**

So here's your TRICK ☺

# THE TRICK

My TRICK comprise of 5 simple Steps:

## STEP 1:

First of all, you must have an account with **MoneyBookers** or **PayPal** or **AlertPay** etc so that you can cash out and deposit your casino earning through this method easily and then get paid directly into your Bank Account.

These are one of the best companies online which securely takes and processes payments. It is very secure and very reliable. If you have been in internet marketing or anything similar, then you definitely know what PayPal or moneybookers or alertpay is about, however if you don't have a clue, I suggest you just take a look at it first just to get an idea. Make sure you sign up for either a Premier or Business account. If you don't have either at the moment, you can upgrade for free which takes seconds. (If you are already signed-up with any payment processor, skip step 1 )

Go to [www.paypal.com](http://www.paypal.com) and simply sign-up with it.

The image shows a screenshot of the PayPal website homepage. At the top, the PayPal logo is displayed in blue. Below it is a navigation bar with tabs for 'Home', 'Personal', 'Business', and 'Products'. Underneath the navigation bar are links for 'Get Started', 'Send Payment', 'Request Payment', 'eBay', and 'Developers'. On the left side, there is a sidebar with a 'Welcome to PayPal' message, a 'Sign Up' button, and a 'Log In' button. Below the login button, there is a link for 'Forgotten your email address or password?'. Further down, there is a 'Top questions' section with links for 'Why use PayPal when I have credit cards?', 'What can I do with PayPal?', and 'Is PayPal free to use?'. The main content area features an advertisement for 'AsiaDeals' by eBay, with the text 'New products at great discounts Free shipping by trusted sellers'. Below the ad, there are three product listings: 'Leather handbag' with a 'Save up to 50%' discount, 'DSLR camera' with a 'Save up to 30%' discount, and 'MP3 player' with a 'Save up to 35%' discount. At the bottom right, there is a 'Pay With: MasterCard' logo. The bottom of the page has two columns: 'Buy online' with a link 'Learn how your purchases are protected' and 'Sell online' with a link 'Accept all payment types in'.

Paypal is not accepted in Some Countries like Pakistan, Bangladesh etc. So you can use another payment processor like [www.payza.com](http://www.payza.com) (Formerly known as Alertpay) or MoneyBookers.

## STEP 2:

Step 2 is to pick an Online casino. There are a number of casino sites on the INTERNET. You can choose any site to play.

The most common are SkyKings, 32Vegas, EuroGrand, Prestige Casino etc etc

Sign-up with any of the above.

Eg.

## **STEP 3 : (The MAIN STEP)**

When you will Sign up to an Account, Ask one of the **Online Operators** via the **LIVE CHAT** to Turn off your “**Bonus**” that you will receive when you make a Deposit. (**All casinos have an online chat**).

**This is what Every Other Site About Casinos fails to teach you.**

If you accept the **bonus**, you will have to abide by their terms & conditions. However, if you do not accept the bonus offer then you are free to play however you like.

**REMEMBER: DON'T ACCEPT BONUS !!**

You can play however you like and You can cash out whenever you like and not wait to reach a wagering requirement and you can play on roulette and still cash out your earnings.

So if you deposit \$50, you can play on roulette for a bit and then cash out after \$100...

You will have made \$50 in your pocket in a few minutes.

**But, if you accepted the bonus, you will never be able to cash out.**

After this Amount, you will have to do roughly 20 times your deposit.

Eg, Deposit \$20 and then cash out after \$4,000 which is very very difficult to achieve.

**Every other site selling casino info will never ever tell you this.**

It is the Best Secret of Casino Playing !!

So the Next Step is about the Martingale system. So let's check it out!! ☺

## STEP 4 :

Use the **Martingale System** on Roulette now.

Let's say you deposited \$50. You can use the Martingale system method and make money.

Eg, \$100 in a few minutes. You can now cash out without any wagering requirements.

So What's the Martingale System ??

A martingale is any of a class of **Betting Strategies**. The simplest of these Strategies was designed for a game in which the Person wins his stake if a coin comes up heads and loses it if the coin comes up tails. The strategy had the Person double his bet after every loss, so that the first win would recover all previous losses plus win a profit equal to the original stake. The martingale strategy has been applied to roulette.

The Martingale system is one of the widely used and oldest gambling techniques applied by roulette players. Those who use the Martingale roulette system can increase their percentage of winning in a single round of roulette from **46 percent to 82 percent**.

## **Playing Martingale roulette is surprisingly simple.**

The Martingale process is as follows:

- ☞ Select a Color to bet on, **Red or Black**. Stick to this color for the entire roulette session. Don't change it in between your playing session.
- ☞ Bet the **lowest denomination** on the chosen color.  
For example, One dollar.
- ☞ If the chosen color lands, the player has won back the amount bet plus one dollar, and the Martingale process starts again with a lowest denomination bet.
- ☞ If the chosen color does not land, double the initial bet. For example, if the last bet was for one dollar, the new bet is for 2 dollars.
- ☞ If the chosen color does not land again, double the bet again. For instance, if the last bet made was for 2 dollars, now bet 4 dollars.
- ☞ Continue doubling the bet each time the chosen color does not win. Statistically, the chosen color has to eventually win. By doubling the bet each time, the player will recoup the amount already lost, plus the value of the initial bet, in this case, a dollar.
- ☞ Once the chosen color wins, the Martingale process begins again, with a lowest denomination bet on the chosen color.

By doubling the bet with every successive loss, the Martingale system theorizes that a win of the minimum bet is inevitable, as the color chosen to bet on, governed by the law of averages, must eventually land.

## **STEP 5:**

Cash out Your Earnings and Repeat on a Regular Basis.

## **OTHER TIPS**

### **In Roulette:**

- ✓ Bet SPLITS instead of STRAIGHT UP numbers.
  - ✓ Bet the first 12, second 12, or third 12, in square groups or in columns.
  - ✓ Time is your enemy in this game, play for five minutes on black or red, or even or odd.
  - ✓ Start, make your money, and stop after regular intervals of time.
- 
- **Absolutely know the games you are playing!**
  - **Don't become overconfident and Over-smart. Play wisely!**
  - **Set a limit on how much money you're going to spend and then stick with it.**

### **Try more positive statements such as:**

- ☆ **My winning machine is calling to me right now, I just have to listen.**
- ☆ **My jackpot is waiting for me here somewhere and I am going to find it.**
- ☆ **The right machine is going to jump right out at me.**
- ☆ **I love playing it, I always have such a good time!**
